Terrassa, Barcelona

PROFILE

Full Stack Developer with 2+ years of experience in full-stack web development (Vue 3, Nuxt, Laravel) and mobile (Android with Kotlin). I've developed and maintained production apps, delivering complete solutions from design to deployment, including API integrations, relational and NoSQL database integration, and support for multiple user roles. I am especially motivated to apply my skills in projects related to banking or financial technology.

EDUCATION

High Technician Multi-platform

Application Development

Institut Nicolau Copèrnic

2022-2024

Industrial Engineering

Universitat Politècnica de Catalunya,

2020-2022

- Incomplete, honors in programming

Social Sciences Baccalaureate

Institut Montserrat Roig,

2017-2019

EXPERIENCE

Android Developer Intern

ESEIAAT - Universitat Politècnica de Catalunya (UPC)

September 2023 –

April 2024

Developed two native Android apps—*Fonts Terrassa* and *Alianzas*—using Jetpack Compose and Kotlin. Built modern, user-friendly UIs, integrated multiple REST APIs, and managed data with Firebase.

Full Stack Developer

Compartim Project - TeclaSocial

October 2024 –

Present

Co-developed a web app from scratch with over 91,000 lines of code (Vue 3, Nuxt front-end; Laravel back-end). Built a multi-role platform supporting 7 user roles, gamification, and multi-language features to enhance engagement for users with mild intellectual disabilities.

Led migration from a legacy no-code system and developed core functionalities including responsive design, role-based access control, social interactions, and notification systems.

LANGUAGES

English – Advanced (C1), Aptis Certificate

Spanish – Native

Catalan – Native
